EXPERIENCE

Full Stack Developer (Capstone Project)
Cloudfit Software

Aug 2023 - May 2024

- Developed a data migration and processing application as part of the senior year capstone project.
- Designed using C# and ASP.NET to interact with custom APIs for fast and efficient data retrieval.

Computer Science Tutor
Liberty University

Aug 2022 - Dec 2023

- Provided personalized tutoring sessions resulting in improved student comprehension.
- Collaborated with faculty to improve assignments based on student feedback.

PROJECTS

Quinn Estate | C#, ASP.NET, Firebase, React, Redux, Tailwind
Real Estate Full Stack Web App

November 2023 - January 2024

[View Code](#)

- Developed a real estate web app with real-time CRUD operations for property listings using C# and ASP.NET.
- Firebase to store user listings and account information, with JWT and BCrypt for secure user authentication.

PlayTube | PHP, MySQL, HTML, CSS, jQuery, Bootstrap 4
YouTube Clone made in PHP and MYSQL

April 2023 - July 2023

[View Code](#)

- Private video routes, limiting access only to approved users viewing certain videos.
- AJAX-driven components such as likes, comments, subscriptions, and video edit forms for custom thumbnails.

PetPal | MongoDB, Express, React, NodeJs
MERN Social media app for your pets

July 2023 - August 2023

[View Code](#)

- Liking and commenting on posts and picture uploading to allow pet owners to set up play dates.
- Secure authentication with JWT and middleware to ensure protected routes.
- User profiles to manage and customize their pet's profile with light and dark themes.

Battle Tanks | HTML, CSS, Node.js, jQuery, Socket.io
Multiplayer Tank Game

October 2023 - December 2023

[View Code](#)

- A multiplayer game using Socket.io, Node.js, HTML5 Canvas, CSS, jQuery, and JavaScript.
- Customizable player health and tank selection menus to personalize the gameplay experience.
